What makes us special?

- Division of the KVSA (Royal Dutch Ship Agencies)
- Over 40 years of experience
- Keywords are quality, reliability and service
- In-house helpdesk (08.00 – 18.00)

Inmarsat-C Service

BTS is an official ISP (Inmarsat Service Provider) and partner of Stratos. We offer an Inmarsat-C service with unique features at competitive prices. Our features are free of charge and are developed to optimize our service.

Our unique features

▪ VoucherModule

The VoucherModule allows you to check your invoices on-line on a password protected website. The module is based on the principle of split billing and makes it possible to split your invoices according to your own preferences. For example; Inmarsat-C costs can be specified per ship or per business unit.

▪ Realtime Monitoring

It is always nice to know if your outgoing message has been delivered. That is the reason why BTS offers Realtime Monitoring in addition to the default notifications. Realtime Monitoring allows you to check your outgoing messages on-line at your leisure.

▪ XML Feed

If you want to send Inmarsat-C messages and receive reports in your own systems, the BTS Inmarsat XML Webservice is the tool for you. By connecting to our XML Webservices you will be provided with realtime reporting and the ability to send Inmarsat messages without using any of our interfaces.

Easy to use

Do you want to start using our unique features?

- Contact our helpdesk (see contact information)
- We will send you a login and a password
- Experience the benefits for yourself!

Tariffs

The following tariffs apply to all Inmarsat-C messages (shore-ship and ship-shore)

- 1.€0.159 per 256 bits without a monthly payment
- 2.€0.149 per 256 bits + monthly payment of €20,-
- 3.€0.139 per 256 bits + monthly payment of €50,-
- 4.€0.129 per 256 bits + monthly payment of €100,-
